□ Course Information

Course Description	<p>Korea remains one of the only two divided nations in the world. The South and the North still continue their Cold War style confrontation in the post-Cold War, 21st century. However, status quo on the Korean Peninsula may not last long.</p> <p>Many important theoretical issues in the field of international relations are embedded in the North Korea problem. The debates among the neo-conservatives, realists, and functionalists regarding the solution of the North Korea problem such as security threats or the human rights problem, illustrate this point.</p> <p>This course will review a few important topics related to North Korea like security (nuclear, missile, conventional) threats, human rights, humanitarian issues, marketization of economy and unifications issues keeping these theoretical debates and the broader international political context in mind.</p>
Course Evaluation	<p>Class participation 30%</p> <p>Midterm exam 35%</p> <p>Final exam 35%</p> <p>Attendance will be important for keeping up with class. Good attendance and active participation will be reflected in grade.</p>
Course Materials	On-line materials and a few hand-outs
Class Policy	
Etc.	

□ Course Schedule (Readings are subject to be revised & updated.)
